

Bootstrap – CSS3 Assignment

Objective:

Create a responsive and visually appealing Clothing website using Bootstrap and custom CSS. This assignment will help you practice using Bootstrap's components and utilities, as well as custom CSS styling.

Tasks:

1. Setup:

Create a new HTML file and link Bootstrap's CSS and JS files from a CDN.

Create a separate CSS file for custom styles and link it to your HTML.

2. Page Structure:

Header:

Use Bootstrap's Navbar component to create a navigation bar with links (Home, About, Services, Contact).

Include a logo or brand name.

About Section:

Create a section with a title and a short description.

Features Section:

Use Bootstrap's grid system to create a responsive layout for services (3-4 columns on larger screens, stacked on smaller screens).

Price Section:

Use Plain HTML table with custom css to display size chart and price chart

Contact Section:

Create a contact form with fields for name, email, message, and a submit button.

Use Bootstrap's form components to style the form.

Footer:

Create a footer with a few links and social media icons (e.g., Facebook, Twitter, LinkedIn). Hint: Glyphicons

3. Custom CSS:

Customize the appearance of your website using your own CSS by adding Moving Text or Slogan near Header/Footer.

Use Descendant child selector to colour the content in contact section.

4. Responsive Design:

Test the website with different screen sizes (desktop, tablet, mobile) to ensure that it is fully responsive.

Submission:

A GitHub repository with all the project files like html, css and screenshot document.

CODE:

HTML:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Clothing Store</title>
